Harmony Human Resources (HR)

Harmony's HR module simplifies your HR processes yet still provides the functions you need, all in a single place.

What you can do in Human Resources:

- Set up additional employee information
- Benefits management
- Document management
- Onboarding & Offboarding procedures
- Performance management, including performance appraisals, goals, and competency groups
- Time off and absence management
- Training management

You should have received our manuals once the implementation of your Harmony database was complete. You can also refer below for the latest versions:
